

INDUSTRIAL PRODUCER PRICE INDEX, SEPTEMBER 2022

Producer prices of industrial products (total)

In September 2022, producer prices of industrial products for total industry increased by 1.8% compared to August 2022. As compared to September 2021, they increased by 22.1%.

Comparison of producer prices of industrial products for total industry, excluding Energy, shows that in September 2022 they increased by 0.5% compared to August 2022 and by 10.3% compared to September 2021.

Producer prices of industrial products on the domestic market (total)

In September 2022, producer prices of industrial products on the domestic market for total industry increased by 3.0% compared to August 2022 and by 30.2% compared to September 2021.

Comparison of producer prices of industrial products on the domestic market for total industry, excluding Energy, shows that in September 2022 they increased by 0.7% compared to August 2022 and by 11.5% compared to September 2021.

G-1 INDUSTRIAL PRODUCER PRICE INDEX ON DOMESTIC MARKET, SEPTEMBER 2018 – SEPTEMBER 2022

Producer prices of industrial products on the non-domestic market (total)

In September 2022, producer prices of industrial products on the non-domestic market for total industry increased by 0.3% compared to August 2022. As compared to September 2021, they increased by 12.4%.

Comparison of producer prices of industrial products on the non-domestic market for total industry, excluding Energy, shows that in September 2022 they increased by 0.4% compared to August 2022 and by 9.2% compared to September 2021.

MIGs 2009. aggregates

Producer prices of industrial products (total)

In September 2022, as compared to August 2022, producer prices of industrial products increased in Energy by 6.6%, in Non-durable consumer goods by 0.8% and in Intermediate goods by 0.7%, while they decreased in Durable consumer goods by 0.9% and in Capital goods by 0.2%.

In September 2022, as compared to September 2021, producer prices of industrial products increased in Energy by 77.0%, in Intermediate goods by 12.4%, in Non-durable consumer goods by 10.1%, in Capital goods by 6.8% and in Durable consumer goods by 6.5%.

Producer prices of industrial products on the domestic market

In September 2022, as compared to August 2022, producer prices of industrial products increased in Energy by 7.9%, in Durable consumer goods by 2.2%, in Non-durable consumer goods by 0.9% and in Intermediate goods by 0.6%, while they decreased in Capital goods by 0.1%.

In September 2022, as compared to September 2021, producer prices of industrial products increased in Energy by 81.5%, in Durable consumer goods by 13.5%, in Non-durable consumer goods by 13.2%, in Intermediate goods by 11.3% and in Capital goods by 5.7%.

 CD Durable consumer goods
 CN Non-durable consumer goods

NKD 2007. sections

B Mining and quarrying
 C Manufacturing
 D Electricity, gas, steam and air conditioning supply
 E Water supply; sewerage, waste management and remediation activities

Producer prices of industrial products on the non-domestic market

In September 2022, as compared to August 2022, producer prices increased in Intermediate goods by 0.8% and in Non-durable consumer goods by 0.6%, while they decreased in Durable consumer goods by 2.7%, in Energy by 0.9% and in Capital goods by 0.3%.

In September 2022, as compared to September 2021, producer prices increased in Energy by 59.2%, in Intermediate goods by 13.2%, in Capital goods by 7.6%, in Non-durable consumer goods by 5.6% and in Durable consumer goods by 2.4%.

NKD 2007. industrial sections

Producer prices of industrial products (total)

In September 2022, as compared to August 2022, producer prices increased in Mining and quarrying by 47.9%, in Electricity, gas, steam and air conditioning supply by 4.2% and in Manufacturing by 0.6%, while they remained stable in Water supply; sewerage, waste management and remediation activities (only division 36).

In September 2022, as compared to September 2021, producer prices increased in Mining and quarrying by 132.7%, in Electricity, gas, steam and air conditioning supply by 59.7%, in Manufacturing by 14.4% and in Water supply; sewerage, waste management and remediation activities (only division 36) by 1.6%.

Producer prices of industrial products on the domestic market

In September 2022, as compared to August 2022, producer prices increased in Mining and quarrying by 49.5%, in Electricity, gas, steam and air conditioning supply by 4.2% and in Manufacturing by 1.0%, while they remained stable in Water supply; sewerage, waste management and remediation activities (only division 36).

In September 2022, as compared to September 2021, producer prices increased in Mining and quarrying by 135.8%, in Electricity, gas, steam and air conditioning supply by 59.7%, in Manufacturing by 16.6% and in Water supply; sewerage, waste management and remediation activities (only division 36) by 1.6%.

NOTES ON METHODOLOGY

Introduction

Industrial producer price indices on the domestic, non-domestic and total market are presented on an interannual chain and on a month-on-month basis as well as on the fixed base year 2015 = 100 due to the harmonisation with the Regulation (EU) No. 2019/2152 of the European Parliament and of the Council of 27 November 2019 on European business statistics, repealing 10 legal acts in the field of business statistics.

Concepts, definitions and terminology are completely harmonised in this First Release with those used and regulated by the EU. Therefore, the term "industrial producers' price index" has been changed to "industrial producer price index".

According to the EU terminology, the term "industrial producer price index" is also known as the "industrial output index" and the term "industrial producer prices" should be considered its synonym. If not specified, the term "industrial producer price index" denotes the "total industrial producer price index" (on the domestic and the non-domestic market).

The concept of industrial producer prices and their purpose

Total industrial producer price index is composed of two sub-indices, that is, the industrial producer price index on the domestic market and the industrial producer price index on the non-domestic market. The combination of sub-indices for these two markets provides the changes in given products/services, while their aggregation provides the divisions of products and activities.

Industrial producer price index measures the changes of producer prices of manufactured goods produced in the Republic of Croatia and sold by producers on the domestic (Croatian) and/or the non-domestic (non-Croatian) market.

Industrial producer price index on the domestic market measures the changes of producer prices of manufactured goods that are produced and sold by producers on the domestic (Croatian) market.

Industrial producer price index on the non-domestic market measures the changes of producer prices of manufactured goods that are sold by producers on foreign (non-Croatian) market.

The industrial producer price index is an important short-term indicator of the business cycle that shows monthly price changes in the total industrial sector (the NKD 2007, sections B, C, D and E – only division 36) on the domestic and the non-domestic market. According to the EU concept, it is an important business indicator that permits monthly monitoring of prices at different stages of the manufacturing process. It is also used for distinguishing effective growth of an activity due to price changes and provides information to the business community on particular markets of their interest. It can also indicate inflationary changes before they reach consumers.

Presentation of the industrial producer price index

In this First Release, all indices are presented in gross (unadjusted) form. They were calculated on the basis of data collected through the revised Monthly Survey on Industrial Producer Prices (IND-3/KPS/M form) for 2022.

Legal and methodological framework

The Monthly Survey on Industrial Producer Prices (IND-3/KPS/M form) in 2022 is carried out directly by the Croatian Bureau of Statistics on the basis of the Official Statistics Act (NN, No. 25/20). The internet application (CAWI method) is used in data collection. The reporting units directly access this application and enter their data on the basis of the instructions given.

The concepts and definitions used in the IND-3/KPS/M Survey are harmonised with the EU concepts and definitions, especially with the Regulation (EU) No. 2019/2152 of the European Parliament and of the Council and the Commission Regulation (EU) No. 2020/1197.

Scope and coverage

The reporting units included in the IND-3/KPS/M Survey are selected enterprises (legal entities and tradesmen) that produce selected products as defined in the Nomenclature of Industrial Products – NIP 2020., classified in the NKD 2007. (NN, Nos 58/07 and 72/07) activity sections B Mining and quarrying, C Manufacturing, D Electricity, gas, steam and air conditioning supply and E Water supply; sewerage, waste management and remediation activities (only division 36).

In order to collect data on industrial producer prices on the domestic and the non-domestic market, the IND-3/KPS/M Survey for 2022 covers a representative sample of industrial products at the level of covered activity classes of the NKD 2007., that is, all products **exceeding 20 million kuna on the domestic market and 15 million kuna on the non-domestic market** according to the results of the PRODCOM Survey on Industrial Production (IND-21/PRODCOM/G form) for 2020, while the selection of enterprises has been done according to their share in the production of selected products, separately for the domestic and the non-domestic market.

For monitoring the **industrial producer prices on the domestic market**, the sample for the IND-3/KPS/M Survey for 2022 covers 2 021 item prices within the selected NIP 2020. products in 1 191 enterprises (legal entities and tradesmen), while for monitoring **industrial producer prices on the non-domestic market**, it covers 1 198 item prices within the selected NIP 2020. products in 712 enterprises (legal entities and tradesmen). In September 2022, the response rate was 96.9%, while the estimation rate of non-responded questionnaires was 3.1%.

Reference point

All industrial producer prices are recorded as transaction prices in effect on the 15th day of the month indicated. The prices at which a producer sells products at the domestic and/or the non-domestic market in the largest quantities to known buyer are recorded.

Completed IND-3/KPS/M forms are delivered directly on the website of the Croatian Bureau of Statistics in the period from 16th to 26th of the current reporting month (<https://podaci.dzs.hr/en/>).

Definitions

Producer price indices on the domestic and the non-domestic market require a separate compilation according to the destination of a product in order to obtain the producer price indices on the domestic and the non-domestic market.

The residency of the third party that has ordered or purchased the product determines the destination. The domestic market is defined when both the third party/buyer and the reporting unit are residents of the Republic of Croatia, while the non-domestic market is defined when the third party/buyer is not a resident of the Republic of Croatia.

Industrial producer prices on the domestic market are either the prices at which a producer sells products on the domestic market in the largest quantities, loaded free on a rail (truck) at a factory gate at the location of the producer or the price charged to another company by the producer. The selling price is increased for the amount of the compensation obtained by the seller and deducted for the amount of the discount and rebate as well as the value added tax and excises.

Industrial producer prices on the non-domestic market are prices at which a producer sells products on the domestic market (outside Croatia) in the largest quantities at the national border, FOB (free on board). The selling price is increased for the amount of the compensation obtained by the seller and deducted for the amount of the discount and rebate as well as the value added tax and excises. The reporting units present prices in the national currency – kuna and lipa. The prices expressed in a foreign currency are converted into the national currency on the basis of the mean exchange rate of the Croatian National Bank on the 15th day of the reference month.

Calculation method

Total industrial producer price index is composed of two subindices, that is, the industrial producer price index on the domestic market and the industrial producer price index on the non-domestic market.

Industrial producer price indices on the domestic market and the non-domestic market are calculated according to the Laspeyres formula for different levels of the NKD 2007.

Individual indices for each representative product are calculated from data on prices by dividing prices of the current period by prices of the base period (December of the previous year).

Aggregate indices, that is, indices of groups, divisions and sections of the NKD 2007, as well as the total industry index are calculated by a weighted arithmetic mean from individual indices according to the modified Laspeyres formula:

$$I = \frac{\sum \frac{P_n}{P_o} \times W_o}{\sum W_o} \times 100$$

Whereby:

I is an index of a group, division, section, subsection and the total index

P_n is a price in the current period (month)

P_o is a price in the base period

W_o is the relative sale structure in the base period.

Weights

The weighting system for 2022 reference year is based on the value of products sold from the PRODCOM Survey on Industrial Production (IND-21/PRODCOM/G form) for 2020. The weighting system is changed at the beginning of every reference year in relation to changes in prices.

Data publishing

The total industrial producer price indices, both on the domestic and the non-domestic market, are published for the total industry according to the NKD 2007, sections and divisions and according to MIGs 2009, aggregates (end use of products) grouped by the NKD 2007, activity groups and divisions. The grouping of the NKD 2007, activity groups or divisions according to the MIGs 2009.¹⁾, using alphabetic marks of abbreviations, was done as follows:

AI	Intermediate goods: the NKD 2007, divisions and groups: 07 (excl. 07.21) – 09, 10.6, 10.9, 13.1 – 13.3, 16, 17, 20.1 – 20.3, 20.5, 20.6, 22 – 24 (excl. 24.46), 25.5 – 25.7, 25.9, 26.1, 26.8, 27.1 – 27.4 and 27.9
AE	Energy: the NKD 2007, divisions: 05, 06, 19, 35 and 36
BB	Capital goods: the NKD 2007, divisions and groups: 25.1 – 25.3, 26.2, 26.3, 26.5, 26.6, 28, 29, 30.2, 32.5 and 33
CD	Durable consumer goods: the NKD 2007, divisions and groups: 26.4, 26.7, 27.5, 30.9, 31, 32.1 and 32.2
