## NOTES ON METHODOLOGY

### Data sources

The data sources for births, deaths and marriages are registers of births, deaths and marriages kept in registrars' offices of every particular area.

The data on live births are collected through the Statistical Report on Births (DEM-1), on deaths through the Statistical Report on Deaths (DEM-2) and on marriages through the Statistical Report on Marriage (DEM-3) for each recording in the state registers of births, deaths and marriages.

The data sources on divorces are registers and acts of municipal courts competent for divorces and are collected through the Statistical Report on Divorce (RB-1).

### Coverage and comparability

Vital statistics data cover all persons who were born, deceased or were married in a particular calendar year and who were entered into registers of births, deaths and marriages. The statistical survey on divorces includes all dissolved marriages for which a valid court decision entered into force in a particular calendar year.

Vital statistics data are collected and processed in line with the definition of total population given in the UN, Eurostat, ESA and SNA recommendations, which has been applied in statistical surveys on live births and deaths since 1998 and in statistical surveys on marriages and divorces since 2000.

### Definitions and explanations

**A live born child (live birth)** is every child who exhibits signs of life at birth, such as breathing, beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles. If a child dies soon after the birth, it is first registered as live born and then as a dead infant.

**A stillborn child (stillbirth)** is considered every child that, after a complete expulsion or extraction from its mother, does not show any evidence of life, that is, who neither breathed nor showed any other evidence of life, providing that the pregnancy lasted for 22 completed weeks or longer, or that the child weighed 500 grams or more. Extraction of a dead foetus with less than completed 22 weeks of gestation or, in case of unknown gestational age and known birth weight of a dead foetus who weighed 499 grams or less, is considered an abortion, irrespective of whether it was a spontaneous or an induced termination of pregnancy. It is neither registered in state registers nor are such data included in the total number of stillborn children.

**A deceased person (death)** is every live born person in which there is a permanent disappearance of all evidence of life.

**Infant death** is considered the death of a child under one year of age.

**Natural increase** is the difference between the number of live born children and the number of dead persons.

**Marriage** is the act by which the legal relationship of a husband and a wife is constituted.

**Divorce** is the final dissolution of a marriage by a valid decision by the municipal court in charge.
