

USAGE OF INFORMATION AND COMMUNICATION TECHNOLOGIES (ICT) IN HOUSEHOLDS AND BY INDIVIDUALS, 2020

**ISPRAVAK
CORRECTION**

The survey results showed that the share of households equipped with ICT in the Republic of Croatia slightly increased compared to the last year. The **number** of households with personal computer increased by 3% and the **number** of households with internet access by 4%. Although the **number** of households with mobile broadband internet access increased by 1% compared to 2019, the **number** of households with fixed broadband internet access decreased slightly, so at the total level, there are no significant changes.

CORRECTION

In the First Release [2.3.2. Usage of Information and Communication Technologies \(ICT\) in Households and by Individuals, 2020](#), of 4 December 2020, an error in data interpretation occurred in parts of the commentary relating to the share of households equipped with ICT in the Republic of Croatia.

Users are therefore kindly requested to use the corrected part of the commentary, which is presented here.

Thank you for your understanding.
